

10L & 20L AQUAPure Sterile Waters

Single-Use Bioprocess Bags

Aquability's **10L & 20L Single-Use Bioprocess Bags** are designed to support efficient, large-scale workflows in more compact sizes than traditional drums. This allows our bioprocess bags to enable streamlined processing and reliable performance while being convenient and easy to handle. Supported by our vertically integrated supply chain and rigorous quality controls, Aquability provides dependable single-use solutions with competitive pricing, fast lead times, and consistent, high-quality performance.

10L

20L

Key Features and Benefits

Unmatched Single-Use System Expertise

- 💧 **Extensive Experience** in single-use manufacturing and package engineering
- 💧 **Complimentary Support** for seamless implementation of our single-use systems
- 💧 **Fully Integrated In-House** bag manufacturing and filling for total quality control

Operational Efficiency with Bulk Packaging

- 💧 **Fewer Containers to Handle** per batch when compared to small volume containers means less time spent opening, drawing, and discarding, improving workflow efficiency
- 💧 **Better Supply Chain Management** results from bulk quantities simplifying inventory control and reducing the frequency of reordering, ensuring a more consistent supply
- 💧 **Improved Flexibility for High-Volume Use** since bulk packaging is ideal for large-scale production, bioprocessing, or compounding operations where substantial volume is required

Cost Savings, Quality Control & Sustainability

- 💧 **Decreased Cost** by buying in bulk, which significantly lowers cost when compared to smaller, unit-dose options
- 💧 **In-House Manufactured** bags ensure dependable purity and consistent quality with reliable lead times
- 💧 **Reduce Environmental Impact** by buying bulk packaging since it often has a smaller carbon footprint per volume when compared to smaller options, contributing to greener operations

High Performance Tubing Built In

- 💧 **3/8" Wall Tubing** provided in extra-long lengths for flexibility in operations
- 💧 **Optimized Tubing Format** includes thick wall tubing ideal for peristaltic pump dispensing and additional welding and sealing
- 💧 **Includes Sterile Male and Female Quick Connectors** which are securely covered to ensure cleanliness
