AQUASTAT SFP™
Sterile Fluid and Path (SFP) Flush Syringes

Affordable Care Without Compromise

AquaStat SFP Syringes provide an economical solution that maintain high quality. The AquaStat SFP Syringes are terminally sterilized through irradiation, ensuring maximum safety and reliability. Clinicians benefit from greater control during use, due to minimal breakforce, thus improving overall patient experience.

With AquaStat Sterile Fluid and Path Flush Syringes, you can trust in a safe and reliable product every time.

The AquaStat Sterile Fluid and Path Flush Syringes, come in a case containing 400 syringes, separated into 4 smaller cartons with 100 syringes each.

Our Process

AquaStat SFP Flush Syringes offer clinicians and their patients the highest quality in a flush syringe at an economical price. AquaStat SFP Flush Syringes are terminally sterilized using irradiation, a process that offers several advantages over conventional steam, heat or gas sterilization.

- Minimal breakforce means less waste and less mess

- Smooth operation gives clinicians greater control

- With Gamma Irradiation as a sterilization method, not only are the Saline contents sterile, but the complete packaging has gone through the sterilization process, eliminating the need for post-process handling.
