

### **N-Nitrosamines Statement – Customer Notice**

Aquabiliti or Aquabiliti's material suppliers do not intentionally use N-Nitrosamines as part of the manufacturing process of our raw materials or products. Although there is not a routine evaluation for Nitrosamines on these products, based on product composition knowledge, Aquabiliti does not expect these substances to be present. However, the fact that the use of these substances is not intentional by Aquabiliti or Aquabiliti's material suppliers does not exclude that trace levels of these substances may be present as a result of the specific characteristics of the raw materials and/or of the manufacturing process. Final determination of the suitability of any materials for their applications is the sole responsibility of the user.

If you have any questions or concerns, please contact us at: TEL: 615-833-2633 URI: [www.aquabiliti.com](http://www.aquabiliti.com)
