

# Applications for the 20mL Flush Syringe

## Situations where the use of a 20mL Flush Syringe is Recommended

- ✓ After a blood draw from an indwelling intravenous catheter
- ✓ Post infusion of viscous solutions like TPN (total parenteral nutrition), blood products or contrast media
- ✓ As a post-infusion flush for emergency Resuscitation drugs such as adenosine, epinephrine, atropine, magnesium sulfate, sodium bicarbonate, dopamine, amiodarone, lidocaine, and procainamide
- ✓ Placement in every Emergency Crash Cart or Box for easy access during life saving events

*"If a resuscitation drug is administered by a peripheral venous route, it should be administered by bolus injection and followed with a 20 mL bolus of IV fluid (which in almost all cases would be normal saline) to facilitate the drug flow from the extremity into the central circulation"*

**- 2010 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care**

Code Number	2S0708
510(k) Number	K133685
Device Listing Number	D218482
Volume (Fill)	20mL
Packaging	100% Sterile*

Packaging Configuration	
Case Quantity	80
Cartons per Case	4
Carton Quantity	20

\*Sterile Field Ready

# Why Does American Made Matter?

**MADE IN AMERICA**

## **Safety**

Is assured as stringent quality requirements are monitored and enforced vigilantly by Federal and State agencies.

## **Sustainability**

Environmental regulations are enforced to a high standard and a much smaller carbon footprint as compared to shipping across continents. Buying American-made products ensures you're doing your part for the environment.

## **Jobs and Wages**

Offshored jobs rarely ever return. One domestic manufacturing job supports five other jobs. Investing in American companies helps provide jobs for future generations.

## **Economy**

Dollars spent in USA, stay in USA supporting our local communities and enhancing American GDP.

## **Independence**

A core American tenet is under siege. Decouple from dependency on cheap imported goods. Lead in building and supporting a robust American supply chain.

## **Ethics and Human Rights**

Laws are in place and enforced to respect and honor these. American manufacturing facilities get held to a higher standard for labor regulations. These regulations protect worker safety and quality standards. Buying American-made products promotes human rights.

## **Quality and Pride**

When you buy American-made products you are ensured of quality. Nothing beats American made. A slightly higher price tag but worth the assurance of rigorous testing and compliance to all applicable requirements.
